

Semi-metal Aftermarket Brake Pad Applications

Featuring a newly developed brake pad friction material for touring and street use, these brake pads offer high braking performance and controllability that is balanced to high precision.

- **Braking Power:** We've developed this semi-metallic compound with a friction coefficient (μ) that matches or surpasses our previous organic/ceramic products.
- **Control / Wear Resistance:** Provides stable braking performance in various conditions encountered during touring, street, and dual-sport riding, such as high temperatures and wet or muddy road surfaces.
- **ECE R90, AMECA Certification:** This product has newly acquired ECE R90, and AMECA certifications, which ensures quality standards for brake pads in Europe and the United States. These certifications ensure high performance and safety through various evaluations and testing.
