## Introducing Hitachi Astemo's New Generation HPP

Hitachi Astemo is proud to announce the latest addition to our range of high pressure pumps (HPP) with our newest "Generation 5".

The Gen 5 HPP series is a completely new development by Hitachi Astemo and can build up pressures to 500bar currently. With their full stainless-steel body, they are designed for:

- Lower noise
- Higher efficiency
- Weight reduction

These pumps are used in vehicles that are still under series production, therefore the amount of VIOs will continue to grow in the future. The Gen 5 HPPs are adopted on the newest VW Group 1.0 TFSI and 1.5 TFSI engines in both ICE and hybrid applications.

Our latest generation HPPs have already been partially released for aftermarket sales. With only 2 SKUs we already cover >2,5 Million vehicles in EMEA, a figure that continues to grow due to on-going serial production.

## High Pressure Pump
